

The workplace looks remarkably different. So we take a remarkably different look.

An insurer who really gets today's workplace trends — and the risks they bring — can be a small business owner's best friend. With Travelers, your small business customers get more than the coverage they need. They get help avoiding trouble in the first place. We identify risks they may not have thought of, take a thoughtful look at how their business is evolving, and help them to protect their business every step of the way.

Unexpected workplace injuries can be difficult to predict or prevent. And the challenge is even greater in an evolving workplace. Workers compensation coverage can protect your small business customers from accidents that affect their workforce stability — and may also help get injured employees back to work faster.

But all workers compensation insurers aren't created equal. Travelers offers superior risk control, claim processing, and customer service. We see things that others don't. And we constantly monitor business trends so we can identify emerging risks in the ever-changing workplace.
