Finding Solutions for All of Your Insureds' Bond Needs

Over the last several months, **Goldleaf Surety** has assisted several fiber optic companies in obtain the bonding support they needed. Working with their surety partners, Goldleaf was able to obtain bonds in situations where others had said no. Each situation below had factors which Goldleaf was able to understand and present to a surety so that they were comfortable with the risk.

- Assisted a private equity owned company which designs, installs and maintains private fiber networks for schools, governmental entities and private business to obtain the bonding necessary to pursue various multi-million dollar public school projects.
- Assisted a privately held company which provides dedicated transport, broadband, Next-Generation Business IP and Next Generation 911 solutions to obtain the bonding needed to pursue a \$15,000,000 project to provide a countywide Next Generation 911 Call Management Systems Services. The company is owned by two independent telecommunications companies; the project was three times larger than any previously performed projects; and it was a 5-year contract where Goldleaf was able to obtain the bond on an annually renewable basis.
- Assisted a privately held company which provides data and voice services to business in both rural and urban areas of the Pacific Northwest, and which is owned by several electrical cooperatives to obtain the bonding needed for a \$5,500,000 project for E-Rate 470 Fiber Optic Cable Infrastructure. Approval for the \$5,500,000 bid bond was received from an A+ (Superior) rated surety company within one business day after submission.

Licensed in all 50 states, Goldleaf's surety specialists create surety bond results for all types of companies and specific bonding requirements. Goldleaf leverages key surety company partnerships and looks forward to sharing that advantage with you.
