WHAT IS THE BIG "I" AGENTS COUNCIL FOR TECHNOLOGY?

The Agents Council for Technology (ACT), a program of the Independent Insurance Agents & Brokers of America, (Big "I") leads the independent insurance agency system in implementing innovative technologies and workflows. This forum of agents, brokers, vendors, carriers, and other industry groups conducts research and provides collaborative recommendations to help the insurance industry implement effective, efficient technology.

BUILD RELATIONSHIPS

Understanding workflow challenges is crucial to our industry's growth. ACT work groups bring members together to share insights that enhance workflows and services.

LEAD TECHNOLOGY PROGRESS

ACT members create industry-wide education, FREE for all Big "I" agents and in addition provide recommendations on emerging trends, cybersecurity, customer experience, data & analytics, disaster planning, and other tech-related focus areas. Our goal is to provide resources to help independent agents increase efficiency and exceed their client's expectations.

BENEFITS OF SUPPORTING ACT

- ✓ Serve on work groups and participate in our bi-annual ACT Meetings alongside other carriers, agents and technology vendors
- ✓ Engage with industry innovators to create roadmaps for effective technology solutions
- ✓ Gain access to a forum for insurance companies, agencies, technology providers, associations and user groups to forecast technology trends
