

CASE STUDY

Coalition for Manufacturing

Coalition's policy covers emerging cyber exposures, including bodily injury, property damage, and pollution

Cyber risk is no longer a purely digital risk. Increasingly, company's industrial processes are controlled by computers, which means they're at risk of being attacked. Coalition's policy is unique in covering the full spectrum of physical damage that can result from a cyber attack, alongside the financial and intangible damages a company can suffer.

INDUSTRY: Manufacturing

COMPANY:

- Employees: 1,000+
- \$225 million in revenue with thousands of endpoints
- Heavy use of operational technology including ICS and SCADA systems

One of Coalition's policyholders, a manufacturer that produces industrial components, experienced a cyber attack on their industrial control systems (ICS). The company's system controlled their production line, and when the hacker gained remote control of the ICS, they inflicted significant damage on the production equipment and destroyed the in-process components.

“

Thank you for your quick response to this claim. Less than two hours, and you've already set-up and assigned the claim and made contact with the insured – amazing! I don't think I have ever seen a quicker response to a claim.

— VERIFIED COALITION POLICYHOLDER

Thankfully, the company was insured by Coalition, and their Bodily Injury and Property Damage and Business Interruption coverages went into effect. Even better, Coalition's Security Incident Response Team (SIRT) helped them regain control of their systems and secure their network to prevent another attack from occurring.

Coalition's industry-leading policy provides coverage for the real exposures businesses face and that other carriers don't cover. With the broadest coverage and proactive cybersecurity tools, you're safer with Coalition.
