ARMR Network's newest environmental insurance program, ARMR HPR™, is bigger than ever before!

Environmental losses can happen to any commercial building, no matter the age, size, or location. As insurers apply pollution, mold, and bacteria exclusions more consistently on commercial property owners and managers' Commercial General Liability and commercial property policies, environmental policies are more important than ever before.

Never sold an environmental policy to a commercial property owner or manager before? No problem! American Risk Management Resources is a world renowned environmental insurance wholesale broker and expert witness. Find out more by visiting us on the [Big "I" Markets](#) under **Pollution Contractors-Farms-USTs-Other** or at www.armr.net.

We are very excited to announce the newest ARMR-designed program, ARMR HPR™, which will be released January 4, 2018 to every independent insurance agent across the country. This program is only available through ARMR.Net; you will not want to miss this!

ARMR HPR™ is the easiest and most efficient new business production opportunity available in your commercial property owner and manager book of business.

Celebrate the official ARMR HPR™ program release with a sales training virtual workshop, January 4th, 2018 at 11:00AM CST. We look forward to seeing you there. [Register here!](#)
