## Uncomplexing Community Bank Coverage

Ever heard of a [Rube Goldberg device](#)? It's a chain reaction machine designed to perform a simple task, such as turning on a light switch, in multiple unnecessary steps; the more the better. Once triggered, a marble can roll down multiple tracks until it hits a series of dominoes which fall and strike a toy car, which rolls across the floor until it strikes a balloon, releasing it skyward, pulling a string which unwinds from a spindle, which rotates a lever, which lifts the light switch upward. *Whew.* That would be considered a simple one.

The [more complex ones](#) take months to set up, have multiple failures until successful and are amazing to watch.

**Community Bank** insurance is very complex and may scare off many agents with its unique coverages and ever-shifting regulations alone. Travelers can turn obtaining coverage for your clients into a kind of reverse Rube Goldberg device by taking something very complex and making it simple. Travelers understands that few agents have the extensive knowledge about banks that they have accumulated so they will walk with you through the entire operation, explaining the process and details of coverages. They will even go with you to pitch the coverage to the client. You don't have to fear offering **Community Bank** coverage. You are not alone because Travelers is there to guide you every step of the way.

**Community Banks** need coverages that can keep up with diverse and changing responsibilities and Travelers® has been serving banks since 1890.

### Critical Policy Features:

- Directors and officers liability, with excess directors and officers individual coverage
