

Turn to Big "I" Markets to Quote Cyber Insurance for Non-Profit Risks

Doing good doesn't exempt non-profit risks from being a target. From breaches of donor information to theft of credit card data, nonprofits face a number of cyber risk exposures.

Offer cyber insurance specifically designed to help charitable and volunteer-based organizations:

- Coverage for consequential reputational harm loss and media and PR costs to respond to an incident
- Restoration of digital assets, including sensitive donor information
- Costs to replace computer systems and other technology damaged in a cyber attack
- Costs to respond to a ransomware (extortion) incident
- Coverage for volunteers
- Costs as a result of security failures or data breaches

[68% of non-profits lack resources to respond to a cyber incident.](#) Coalition helps policyholders protect their network and their business by offering a full suite of security apps including 24/7 security monitoring, automated threat and intelligence alerts, DDoS mitigation, security benchmarking, ransomware protection, employee training, patch reminders, and more-included with each policy, all at no additional cost!

When an incident happens, Coalition is the only insurance firm with a dedicated 24/7 incident response and claims team to help non-profits respond to an incident. Coalition's team of security and insurance experts are dedicated to getting your clients back up and running following a cyber incident. This same team is available as a pre-breach resource to help policyholders implement security and loss controls, again, all at no additional cost!
