PERSONALITY
DATA ALL IN
ONE PLACE

Introducing Caliper Analytics™

Dig into your Caliper Profile data in the time it takes to log into your account

Powered by the Caliper Profile, Caliper Analytics™ displays personality data in a clear, compelling way so you can predict success and answer critical questions about your workforce for hiring, employee development, and workforce planning.

Why Caliper Analytics™?

- Get immediate access to your Caliper Profile results
- Easily organize and filter your talent data to quickly fill open positions
- Identify trends or outliers, as well as perform real-time comparisons
- Quickly identify and compare ideal candidates
- Get access to data from past candidates; no re-assessment required
- Compare teams and managers to identify gaps and potential conflicts
- Access data for high-potential development and succession initiatives

Getting started with Caliper Analytics

1 Analyze

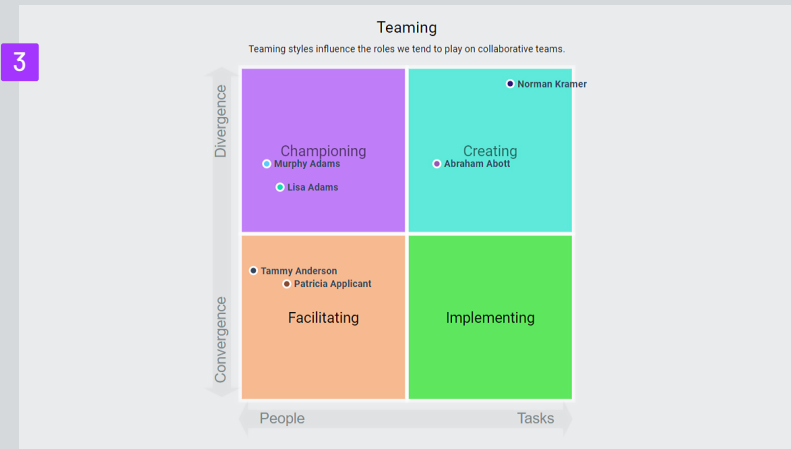

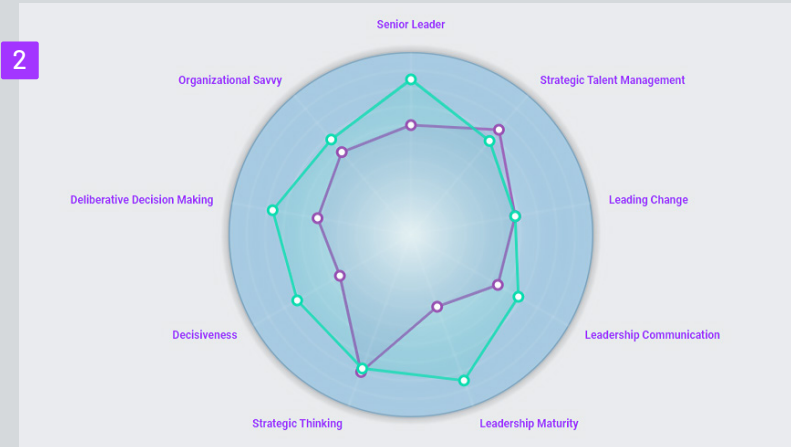

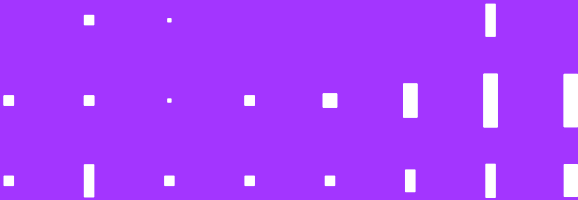

A Talogy Consultant will work with you to analyze and define the positions you want to fill. We will help you identify key responsibilities as well as the competencies and behaviors required for success in those roles. Then, Talogy will be able to set up those jobs in the Caliper Analytics™ system and build your customized dashboard.

2 Assess

You will be able to assess potential candidates as well as current employees using Caliper platform's assessments. Once the individuals you have selected complete the Caliper Profile, results will be available immediately in your custom Caliper Analytics™ dashboard.

3 Acquire

Your Talogy Consultant will be available at any time to discuss candidates and to help you throughout your hiring process. Using custom searches and filters based on key responsibilities and behaviors, you will be able to evaluate and select the best talent to fill your open positions.
